

雙向翻譯訓練教材

從「看得懂」到「說得出」的回譯能力提升指南

內容根據你目前的回譯練習整理，設計目標是：即使一年後再看，也能直接拿來複習與自我修正。

這份教材適合你現在的狀態：你已經能理解句意，也能保留大致邏輯；真正卡住的是英文的固定搭配、句型轉換、語氣層級，以及把中文概念改寫成英文慣用表達。

如何使用這份教材

- 先看「你的程度判斷」，確定自己目前不是理解不足，而是表達模板不足。
- 再看「錯誤類型總表」，把你的錯誤對號入座。不要把所有錯誤都當成文法錯，很多其實是搭配錯、語氣錯，或是中文直譯。
- 閱讀每個錯誤類型時，先看定義，再看判斷標記，再看例句。例句來自你實際做過的練習，因此比一般教科書更貼近你的問題。
- 最後看「固定句型庫」與「自我檢查清單」。它們的作用不是讓你背單字，而是讓你在翻譯時先選對英文骨架，再填入詞彙。

你目前的程度判斷

你不是從零開始。你已經能抓到原文的論述方向、轉折、條件、因果與強調。很多時候，你的中文翻譯也相當接近原意。

真正的瓶頸在於：你把中文意思搬回英文時，常常不是先想英文常用搭配，而是先把中文拆成字，再用英文單字拼回去。這會造成介系詞錯、詞性錯、冠詞錯、複數錯、時態錯，以及正式語氣消失。

你的優勢是：理解力高、句子邏輯抓得準、對抽象概念的掌握不差。

你的短板是：英文輸出還沒有形成穩定的「句型庫」與「搭配庫」。因此，一旦句子變成學術風格、假設語氣、倒裝、被動、抽象名詞化，就容易掉回中文邏輯。

錯誤類型總表

類型	典型表現	嚴重度	你目前的狀況
搭配錯誤	struggle on / life quality / more good	高	最常見，表示你在直譯中文結構
文法錯誤	If I aware / to analyzing / a insight	高	基礎文法多半懂，但輸出時常漏關鍵成分
時態與假設語氣	will / could / would have / had ... been	非常高	是你目前最重要的突破點
詞性錯誤	effective vs efficiently / ability vs able	高	常把中文意思直接對到錯的詞性
語氣問題	people commonly think / more and more	中高	口語化，學術感不足
被動與倒裝	are implemented / Not until ... did ...	非常高	這是高階句型，會影響整句是否像英文

先把這些術語看懂

術語	意思	你要怎麼理解
collocation	固定搭配	不是每個單字都能自由組合，英文常有固定說法，例如 provide insights into, play a role, struggle with。
register	語域 / 語氣層級	同一個意思可以有口語版和正式版，例如 worry vs concern, think vs it is believed that。
inversion	倒裝	把一般語序翻轉來強調，例如 Not until ...

		did he realize ... 。
passive voice	被動語態	重點是動作結果，不是誰做的，例如 strategies are implemented 。
article	冠詞 a / an / the	英文名詞常需要冠詞，中文沒有，所以很容易漏掉。
subordinate clause	從句	句子中依附在主句裡的部分，例如 if ... , although ... , unless ... 。

一、你現在最核心的問題：不是不懂，而是沒有把中文切換成英文骨架

你目前的回譯，最像是先把中文意思理解，再去找英文單字，最後把單字塞回中文語序。這種方法短期內看起來可行，但一旦句子變得正式、抽象、含有倒裝、假設語氣、被動或名詞化，就會大量出錯。

更好的流程是：先辨認句型，再找搭配，再決定語氣與時態，最後才填入字詞。

記住這個順序：英文不是先背單字再湊句子，而是先選對句型，再選對搭配。

二、錯誤類型一：搭配錯誤 (collocation error)

定義

搭配錯誤不是單字完全不知道，而是知道每個字，卻不知道它們在英文裡通常怎麼黏在一起。

典型特徵

- 你會把中文裡看起來合理的組合直接翻成英文。
- 單字本身常常沒有錯，但整個片語聽起來不像英語母語者會說的話。
- 這是你最常見、也最值得優先修正的問題。

你的例子

原文	The reason why many students struggle with academic writing is not a lack of ideas, but rather an inability to organize their thoughts
----	--

	coherently.
你的中間語言	許多學生學術寫作困難的原因，不在於缺乏想法，而在於無法把思路條理清楚地組織起來。
你的回譯	The reason why many students struggle on academic writing, isn't lack on idea, but inability of organizing their thoughts coherently.
最接近原文的正確版本	The reason why many students struggle with academic writing is not a lack of ideas, but rather an inability to organize their thoughts coherently.

錯誤判斷

- 錯誤內容：struggle on / lack on idea / inability of organizing / academically awkward phrasing
- 為什麼會這樣：你知道中文意思，但把中文的介系詞和動詞結構直接搬到英文。英文裡這些位置有固定搭配，不能隨意替換。
- 規則：搭配要整塊記：struggle with, lack of, inability to + V, organize thoughts coherently。

常見搭配記憶：struggle with, provide insights into, attribute A to B, draw conclusions, play a role, be likely to

你這類錯誤的修正方法

- 不要問『這個字是不是對』，要問『英文通常怎麼說這個意思』。
- 每次背單字時，至少一起背兩到三個搭配。
- 看到中文抽象名詞時，先查英文慣用結構，不要直接翻譯字面。

三、錯誤類型二：詞性、冠詞與單複數

定義

這一類錯誤通常不是你不懂單字，而是你把名詞、動詞、形容詞、副詞互相拿錯；或者漏掉英文必須有的 a / an / the、複數 -s、所有格 's。

你的例子

原文	It is widely believed that technological advancements have significantly improved our quality of life; however, they have also introduced new ethical challenges.
你的中間語言	人們普遍認為，科技進步顯著改善了我們的生活品質；然而，它也帶來了新的倫理挑戰。
你的回譯	People commonly think technology advancement improve our life quality, however, it also brings new ethical challenges.
最接近原文的正確版本	It is widely believed that technological advancements have significantly improved our quality of life; however, they have also introduced new ethical challenges.

錯誤判斷

- 錯誤內容：technology advancement / improve / life quality / it vs they / missing articles
- 為什麼會這樣：你對意思有掌握，但英文需要名詞和形容詞的正確形式。中文沒有冠詞與複數標記，所以這類錯誤很容易自然發生。
- 規則：先檢查名詞是不是複數，再檢查要不要冠詞，最後才看動詞形式是否和主詞一致。

最常見修正：a/an 不能漏；the 要視是否特定；單複數一定要一致；technology 常需要形容詞化成 technological。

判斷口訣

- 名詞前先問：這是可數還是不可數？
- 這裡是泛指還是特定？
- 主詞是單數還是複數？

四、錯誤類型三：時態與假設語氣

定義

這類錯誤最致命。中文常只用『如果、若、早知道、直到、才、將能』表達條件與假設，但英文必須把時間和真假狀態明確寫出來。

你目前最需要記住的三種句型：

- 現在假設：If I knew ..., I would ...
- 過去假設：If I had known ..., I would have ...
- 倒裝過去假設：Had I known ..., I would have ...

你的例子 1

原文	Had I been aware of the potential risks, I would have approached the situation with greater caution.
你的中間語言	若我當時早知道潛在風險，我會更加謹慎地處理這個情況。
你的回譯	If I aware the potentially risk early, I will handle the situation more cautiously.
最接近原文的正確版本	If I had been aware of the potential risks, I would have approached the situation with greater caution.

錯誤判斷

- 錯誤內容：If I aware / potentially risk / I will / handle / more cautiously
- 為什麼會這樣：中文的『若我當時早知道』沒有直接標出英文需要的過去完成式與假設語氣，所以你一般現在、未來式拼成了錯句。
- 規則：看到『當時、早知道、若...會...』，先判定為過去假設，再使用 had + p.p. / would have + p.p.。

你的例子 2

原文	Had more resources been allocated to the project earlier, the team could have achieved substantially better results.
你的中間語言	若該項目能及早獲得更多資源，團隊將能取得成效顯著提升的結果。
你的回譯	If the project could early obtain more resources, the team will have more good results.
最接近原文的正確版本	If more resources had been allocated to the project earlier, the team could have achieved substantially better results.

錯誤判斷

- 錯誤內容：could early obtain / will have / more good results / missing passive voice
- 為什麼會這樣：這裡最關鍵的是『過去沒發生的假設』。英文要用 had been allocated，而不是 could + 原形。你也把原文的被動語態換成了主動語態，意思雖近，但語感不對。
- 規則：遇到『若當時能...』，優先想 had been ... / could have ...，不要先想 could + 動詞。

五、錯誤類型四：倒裝與強調結構

定義

有些英文句子不是照中文順序說，而是用倒裝來強調『直到...才』『只有...才』『不但...而且...』這些結構。

你的例子

原文	Not until he encountered significant difficulties did he realize the importance of careful planning and time management.
你的中間語言	直到遭遇重大困難，他才意識到周密規劃與時間管理的重要性。
你的回譯	Until encounter significant struggle, he aware the importance of careful planning and time management.
最接近原文的正確版本	Not until he encountered significant difficulties did he realize the importance of careful planning and time management.

錯誤判斷

- 錯誤內容：Until encounter / significant struggle / he aware / missing inversion
- 為什麼會這樣：中文是『直到...才...』，英文常要用 not until 來做倒裝。你沒有把『才』的結構轉成英語的倒裝句型，因此整句失去原文的重點。
- 規則：看到『直到...才』，先想 not until ... did ...，再決定要不要改成較安全的一般語序。

安全替代版本

- He did not realize the importance of careful planning and time management until he encountered significant difficulties.

- Until he encountered significant difficulties, he did not realize the importance of careful planning and time management.

六、錯誤類型五：被動語態與動作焦點

定義

中文常不太需要說明『誰做了這件事』，但英文學術句很常用被動語態，因為重點是結果或程序，而不是執行者。

你的例子

原文	Unless effective communication strategies are implemented, misunderstandings and conflicts are likely to escalate in collaborative environments.
你的中間語言	除非採用有效的溝通策略，否則誤解與衝突在協作環境中可能加劇。
你的回譯	Unless adapt efficient communication strategy, misunderstanding and fight will gradually increase in collaborative environment.
最接近原文的正確版本	Unless effective communication strategies are implemented, misunderstandings and conflicts are likely to escalate in collaborative environments.

錯誤判斷

- 錯誤內容：adapt / efficient / strategy / misunderstanding / fight / will increase / environment
- 為什麼會這樣：中文裡『採用策略』看起來像動詞直接對應，但英文在這裡更自然的是被動：strategies are implemented。你還把 conflict 換成了 fight，語域立刻變口語。
- 規則：學術英文常把『做了什麼』換成被動語態，重點放在結果、風險、影響、程序。

關鍵對照

- implement strategies = 執行/落實策略
- adopt strategies = 採用策略
- conflicts = 抽象衝突，不是打架

- escalate = 惡化、升級，比 increase 更精準

七、錯誤類型六：語氣與正式度

定義

同一個意思，英文可以很口語，也可以很正式。你現在常會選到意思差不多、但語域偏低的字，讓整句不像學術英文。

你的例子

原文	There is growing concern that excessive reliance on technology may gradually diminish individuals' capacity for independent thinking.
你的中間語言	人們越來越擔心，過度依賴科技可能逐漸削弱個體的獨立思考能力。
你的回譯	It is more and more worry that excessive reliance on technology might weaken individual' s ability to think independently.
最接近原文的正確版本	There is growing concern that excessive reliance on technology may gradually diminish individuals' capacity for independent thinking.

錯誤判斷

- 錯誤內容：more and more worry / might weaken / individual' s / ability to think independently
- 為什麼會這樣：worry 太口語，concern 才是學術寫作常見名詞；more and more 也比 growing 口語；individuals' capacity for independent thinking 比 ability to think independently 更像正式論述。
- 規則：正式英文常用名詞化表達 (concern, capacity, exposure, perspective)，少用口語化的動詞串。

語氣對照

- people commonly think → it is widely believed that
- more and more → increasingly / growing
- think → believe / suggest / indicate / concern
- important → crucial / imperative / essential (視語境而定)

八、錯誤類型七：抽象名詞化與學術搭配

定義

學術英文喜歡把動作變成名詞，把說法變成抽象結構。中文可以很動態，但英文常需要更穩定、更名詞化的表達。

你的例子

原文	Given the complexity of the issue, it is imperative to approach it from multiple perspectives before drawing any conclusions.
你的中間語言	考慮到問題的複雜性，在下結論前從多個角度進行分析是非常重要的。
你的回譯	Considering the complexity of the issue, it is crucial to analyzing multi-aspect before writing the conclusion.
最接近原文的正確版本	Given the complexity of the issue, it is imperative to approach it from multiple perspectives before drawing any conclusions.

錯誤判斷

- 錯誤內容：to analyzing / multi-aspect / writing the conclusion / missing approach
- 為什麼會這樣：你理解『多角度分析、下結論前先處理』，但把這些概念拆成中文式字詞後再拼回英文，結果句子雖有意思，卻不像英文。真正的英文會用 multiple perspectives / draw conclusions / approach it。
- 規則：抽象思考不要自己造詞；優先找英文現成的學術片語。

你的例子

原文	Emerging evidence suggests that early exposure to diverse experiences can significantly enhance cognitive flexibility and creativity.
你的中間語言	最新證據顯示，早期接觸多元經驗可以顯著提升認知彈性與創造力。
你的回譯	Emerging evidence shows that early touch multi-experience could gradually increase cognitive flexibility and creativity.
最接近原文的正確版本	Emerging evidence suggests that early exposure to diverse experiences

確版本

can significantly enhance cognitive flexibility and creativity.

錯誤判斷

- 錯誤內容：shows / early touch / multi-experience / could / gradually increase
- 為什麼會這樣：這句你幾乎抓對結構，但關鍵學術詞彙選錯。exposure 不是 touch，diverse 不是 multi-，enhance 不是 increase。這類錯誤會讓句子看起來像翻譯機而不是英文。
- 規則：學術英文常見模式是：abstract noun + formal verb + precise modifier，例如 exposure to, suggest that, enhance, significantly.

九、你需要背下來的固定句型庫

這些不是單字表，而是你現在最應該優先內化的句型。請把整塊看成一個單位，不要拆開翻。

英文句型	中文意思 / 用法
It is widely believed that ...	人們普遍認為.....
There is growing concern that ...	人們越來越擔心.....
While it is tempting to ... , ...	雖然很容易想要.....，但.....
Given the complexity of the issue, ...	考慮到問題的複雜性，.....
Unless ... are implemented, ... are likely to ...	除非.....被實施，否則.....很可能.....
Not until ... did ...	直到.....才.....
Had ... been ..., ... could have ...	如果當時.....，本來可以.....
The reason why ... is not ..., but rather ...	原因不在於.....，而在於.....
It is imperative to ...	有必要..... / 必須.....
... play a far more crucial role	扮演更關鍵的角色

十、翻回英文時的固定流程

1. 先判斷句子類型：陳述、轉折、條件、假設、倒裝、被動，還是學術抽象句。
2. 找固定骨架：例如 It is widely believed that, There is growing concern that, Had ... been ..., Not until ... did ...。

3. 確認主詞是單數還是複數，動詞時態是現在、過去，還是假設語氣。
4. 再填搭配：struggle with, provide insights into, play a role, draw conclusions, be likely to, are implemented。
5. 最後才看冠詞、複數、標點、介系詞與語氣強弱。

最重要的工作原則： 不要先想中文單字對英文單字，而是先想英文句型對中文意思。

十一、每次回譯前的自我檢查清單

- 我有沒有先判斷這句是不是假設語氣、倒裝句、被動句或學術句？
- 我有沒有用英文的固定搭配，而不是中文直譯？
- 主詞和動詞的人稱、單複數是否一致？
- 名詞前要不要 a / an / the？
- 這個名詞應該是單數還是複數？
- 我有沒有把『可能、顯著、逐漸、越來越』分清楚？
- 我用的是正式英文，還是口語英文？
- 有沒有不必要的新字，像 early、multi-aspect、fight、more good？

附錄：你做過的例題總整理

下面這一段是給一年後的你看的。它把你曾經出現過的錯誤集中整理在一起，方便快速複習。

原文	你的主要注意點
Although the experiment did not produce the expected results, it provided valuable insights into the limitations of the current methodology.	produce the expected results / provide insights into / limitations of the current methodology
It is widely believed that technological advancements have significantly improved our quality of life; however, they have also introduced new ethical challenges.	It is widely believed that / technological advancements / quality of life / introduced new ethical challenges
Had I been aware of the potential risks, I would have approached the situation with greater caution.	Had I been aware of ... / would have approached / greater caution
The reason why many students struggle with academic writing is not a lack of ideas, but rather an inability to	struggle with / lack of ideas / inability to + V / organize thoughts coherently

organize their thoughts coherently.	
While it is tempting to attribute success solely to talent, consistent effort and the ability to learn from failure often play a far more crucial role.	tempting to attribute A to B / consistent effort / the ability to learn from failure / play a role
There is growing concern that excessive reliance on technology may gradually diminish individuals' capacity for independent thinking.	There is growing concern that / diminish / individuals' capacity for independent thinking
Given the complexity of the issue, it is imperative to approach it from multiple perspectives before drawing any conclusions.	Given the complexity of the issue / imperative / approach it from multiple perspectives / draw conclusions
Emerging evidence suggests that early exposure to diverse experiences can significantly enhance cognitive flexibility and creativity.	emerging evidence suggests that / early exposure to / diverse experiences / significantly enhance
Unless effective communication strategies are implemented, misunderstandings and conflicts are likely to escalate in collaborative environments.	Unless ... are implemented / misunderstandings and conflicts / are likely to escalate / collaborative environments
Not until he encountered significant difficulties did he realize the importance of careful planning and time management.	Not until ... did ... / encountered significant difficulties / realize the importance of ...
Had more resources been allocated to the project earlier, the team could have achieved substantially better results.	Had more resources been allocated / could have achieved / substantially better results

十二、一年後重讀時怎麼用這份教材

- 先只看『錯誤類型總表』和『固定句型庫』，回想自己最常錯的是哪幾類。
- 再看附錄，把每一句的正確骨架默念一次，不要只看中文意思。
- 如果一題看不出錯，直接把原文遮住，嘗試自己重譯一次，再對照正確版本。
- 每次練習只要抓到一個高頻錯誤並修正，比一次背很多單字更有效。

最後提醒：你現在最值錢的能力是理解。接下來的工作不是再增加很多新單字，而是把英文固定句型變成自動反應。
